

# Where does work go from here? The data is in.

New research shows that if you ask the global workforce about the future of work:

**58%** expect to be working from home (WFH) eight or more days a month.

**98%** expect that future meetings will involve WFH participants.

Yet **98%** of remote workers report frequent frustrations with video meetings, including:

**50%** Poor audio quality

**34%** Laptop fatigue

**28%** Concerns about background appearance

What would make for a better WFH experience?

**94%** say their experience can be improved. Here are their top requested items:

**59%** Collaboration devices

**51%** Digital note-taking assistants

**47%** Digital whiteboard technology

What about returning to the office?

**97%** want changes to make the work environment safer. They are concerned about:

**64%** Touching shared office devices

**52%** Knowing when a room was last cleaned

**41%** Knowing if a room is over capacity for social distancing

How do we safely return?

**94%** of companies say they can provide peace of mind with innovations like:

- 1 Touchless meeting controls and wireless screen sharing
- 2 Digital signage to provide guidance and alerts
- 3 Digital office navigation to help workers find available spaces

Both at home and in the office, workers want something better:

**94%** want better WFH collaboration experiences.

**89%** are frustrated with in-office experiences.

## So how do we provide safer, better experiences?

**96%** of companies say they could improve work environments with intelligent workplace technology.

Intelligent workplace solutions from Webex support the modern workforce. From the home office to the boardroom, displays, sensors, artificial intelligence, and automation deliver technology-driven experiences and accelerate transformation to keep workers safe and productive.

## The future of work is hybrid.

Businesses will need to support a mix of in-office and remote workers. Cisco is here to help.
